

# Sibling Support Demonstration Project Overview Logic Model

**Color Key**

- Pink: Effects on siblings
- Yellow: Effects on parents
- Orange: Effects on both siblings and parents
- Blue: Effects on health care system

**\*PROGRAM GOALS**

**Unintended positive outcomes:**

- Parents develop awareness of the importance of self-care
- Typically-developing siblings take on guardianship of their brother or sister with a disability
- Parents advocate for change in the health system

**Assumptions:**

- Partnerships are developed with pediatric & adolescent psychiatric units
- Parents and siblings from the same family all participate in groups
- Participants attend a minimum of 1 group each
- Hospitals and hospital leadership are willing to collaborate
- Project has ongoing funding
- Group model is the most effective modality for delivering this service
- Post hospitalization services for families will be developed
- Family units are able to function at minimal level
